

1. Provide separate Detector Loop Cable to controller cabinet for each loop detector. Existing cables may be reused if they are in acceptable condition.
2. Refer to Caltrans standard plan ES-5B for Detector Loop sawcut and winding details.
3. Loops shall be centered in lanes except for curb lanes greater than 12 feet where they shall be installed 3 feet from the lane line, unless specified otherwise on the plans.
4. See CSJ Standard Details E-71 and E-72, and CSJ Standard Specification 86-5 for other requirements.
5. Provide and install additional detector cards as required.
6. All work shall be coordinated with CSJ Department of Transportation (DOT) Electrical Maintenance Section.
